

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash--*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from

governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts which include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions--payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions--payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions--payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 U.S.C. 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays, and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the

“Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes internal revenue collections by States and other areas and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax

liability years because they consist of prepayments (i.e., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (i.e., payments with delinquent returns or on delinquent accounts).

It is important to note that these data do not necessarily reflect the Federal tax burden of individual States. Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one State and work in another.

Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal 1997 supplements fiscal data reported in the June issue of the “Treasury Bulletin.” At the time of that issue’s release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts were \$161.1 billion for the second quarter of fiscal 1997. This was an increase of \$12.0 billion over the comparable quarter for fiscal 1996. Withheld receipts increased by \$9.9 billion and non-withheld receipts increased by \$2.8 billion during this period. Refunds increased by \$0.6 billion over the comparable fiscal 1996 quarter. There was a decrease of \$4.1 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 1996.

Corporate income taxes—Net corporate receipts for the first quarter of fiscal 1997 totaled \$25.8 billion. This was \$3.5 billion higher than net receipts for the comparable quarter of fiscal 1996. The \$3.5 billion figure consisted of \$3.4 billion in higher estimated and final payments plus \$0.1 billion in lower refunds. The increase in net receipts mainly reflected higher corporate profits.

Employment taxes and contributions—Employment taxes and contributions receipts for the second quarter of fiscal 1997 were \$129.8 billion, an increase of \$11.9 billion over the comparable prior year quarter. Receipts to the Old-Age Survi-

vors Insurance, Disability Insurance, and Hospital Insurance trust funds changed by \$8.7 billion, -\$0.6 billion, and \$3.2 billion, respectively, over receipts from the comparable prior year quarter. There were no adjustments for prior years liabilities made in the second quarter of fiscal 1997. This resulted in an increase of \$4.1 billion from the comparable quarter of the prior year.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.1 billion for the second quarter of fiscal 1997. There was a negligible decrease in receipts from the comparable quarter of fiscal 1996. The growth in contributions will remain flat over the next few years as the number of employees covered by the Federal employees’ retirement system (FERS) falls slowly relative to those covered under the civil service retirement system (CSRS).

Unemployment insurance—Unemployment insurance receipts for the second quarter of fiscal 1997 were \$3.9 billion, which represented a negligible decrease over the comparable quarter of fiscal 1996. State taxes deposited in the U.S. Treasury decreased by \$0.1 billion, Federal Unemployment Tax Act (FUTA) receipts increased \$0.1 billion, and Railroad Unemployment tax receipts changed little from the comparable quarter of fiscal 1995.

Excise taxes—Net excise tax receipts for the second quarter of fiscal 1997 were \$13.3 billion, an increase of \$0.6 billion over the comparable prior year quarter. Total excise

tax refunds for the quarter were \$0.5 billion, an increase of \$0.3 billion over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$4.3 billion for the January through March quarter of fiscal 1997. These receipts decreased \$0.1 billion from the previous quarter, but increased \$0.7 billion from the same quarter in fiscal 1996.

Custom duties—Net customs receipts were \$4.2 billion for the second quarter of fiscal 1997. This was approximately

\$0.3 billion less than the customs duties received in the Treasury from the comparable prior year quarter. This difference was attributable to a decrease in dutiable imports.

Miscellaneous receipts—Net miscellaneous receipts for the second quarter of fiscal 1997 were \$5.7 billion, a decrease of \$0.6 billion over the comparable prior year quarter. Deposits of earnings by Federal Reserve banks decreased by \$1.0 billion over the same time period from the prior year. ◇

Total On-and Off-Budget Results and Financing of the U.S. Government

[In millions of dollars. Source: Financial Management Service]

	Third quarter April-June	Actual fiscal year to date
Total on- and off-budget results:		
Total receipts	496,442	1,191,545
On-budget receipts	387,066	897,638
Off-budget receipts	109,377	293,907
Total outlays	396,475	1,202,415
On-budget outlays	325,847	981,834
Off-budget outlays	70,628	220,581
Total surplus or deficit (-)	99,968	-10,870
On-budget surplus or deficit (-)	61,219	-84,196
Off-budget surplus or deficit (-)	38,749	73,326
Means of financing:		
Borrowing from the public	-69,202	27,549
Reduction of operating cash	-17,763	-7,034
Other means	-13,003	-9,645
Total on- and off-budget financing	-99,968	10,870
